## BULLETIN #14

**OCT 25, 2024**

The Board has been informed by the Shore Armoring Committee that our shore armoring permit has been rejected by the Washington State Dept of Ecology. The Board is disappointed with the state's final decision.

We thank the Shore Armoring chair, Ed Delahanty and his entire volunteer team for their tireless dedication, perseverance and extraordinary efforts during the past few years on this voter approved project.

We are researching and will consider several alternative options. The options will be presented to members at the January ACBC Annual Meeting for discussion. Revisions to the original plan may require member approval. Your Board has not given up in the pursuit of protecting our most valuable community recreational assets!

Regards,

ACBC Board of Directors
